

Enjoy crystal clear water with no more red-burning eyes

And you'll have a ball!

Real Benefits

Crystal Clear Water. You will be amazed at the clarity of the water. Swim in water that exceeds EPA standards for drinking water! You will never go back into a heavily chlorinated pool or spa again.

Health & Environmental. Chlorine absorbs through your skin and is detrimental to your health and environment.

Money Saving. Your investment is quickly recovered by virtually eliminating costly chlorine products, algaecides and by prolonging pool equipment.

Time Saving. Forget about the busy chore of chlorination and pool/spa monitoring.

Reduce Corrosion. Pool/spa equipment, vinyl liners, hoses, covers, pool cleaners and solar equipment will last much longer.

5-Year Warranty. Your unit comes with a full 5-year, 100% warranty.

MineralPURE™

Pool & Spa

A revolution in water purification

Transform your pool or spa into an oasis of mineral spring water... naturally

For nearly 100 years, chlorine has been perceived as the only way to disinfect water in swimming pools and spas. Yet this method commonly yields red, irritated eyes, dry and brittle hair, swimmer's ear, dry itchy skin, bleached out swimsuits and a distinct odor on your body and in the water.

Chlorine is a strong bleach and is dangerous. Studies have linked it with cancer, and scientists claim it is a leading cause of erosion of the Earth's ozone layer.

The bottom line is... nobody likes CHLORINE!

Is there a safer, more effective and economical alternative?

Introducing

MineralPURE™

The safe, environmentally friendly alternative to chlorine & algaecides

What others are saying

"I have always enjoyed underwater swimming and with your units I was able to have my eyes open without any of the typical burning sensations.

Brian W. Palmer, - Columbus, Ohio

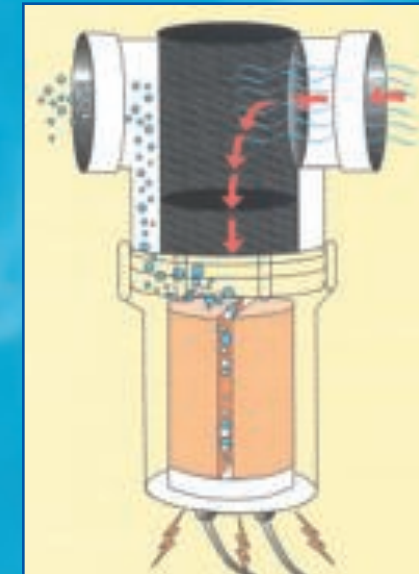

"The system works beautifully and is so easy to maintain. It is one of the best additions we've made for our home. As an added bonus, we have the satisfaction of knowing that we're not polluting the environment. I highly recommend it to every pool owner"

A. Nunziata, - Seminole, Florida

"Since we had a Clearwater ionization system installed, our water no longer has the odor of chlorine. Everyone that came to swim during the summer notices their eyes no longer burned and they didn't smell of chlorine after swimming. We also noticed that our water was so clean and fresh"

Mr. & Mrs. Winn, - Oklahoma

By using safe, natural minerals as a basis for its technology, Clearwater Enviro Technologies, Inc., of Clearwater, Florida, has developed a system that can greatly reduce the amount of chlorine you use in your pool or spa.

Clearwater's ionization process

The system consists of a pair of scientifically formulated electrodes, comprised of copper and silver that are placed in-line of your existing equipment in a unique flow-cell chamber. A microprocessor designed control box releases a controllable low-voltage DC charge to the electrodes, releasing safe and natural mineral ions into the water.

The copper-ions kill algae, while the silver-ions kill bacteria and viruses.
